2017 SCOTT FIREFIGHTER STAIRCLIMB

Every March, 2,000 firefighters from around the world participate in the Leukemia & Lymphoma Society's annual event that seeks to further blood cancer research and patient services. It's a race to the top of the second tallest building west of the Mississippi in full structural firefighting gear and on air. While we know this is a physical feat and strenuous journey, it is nothing compared to what cancer patients endure. We climb to find a cure.

1,356 steps // 69 flights of stairs // 788 feet of vertical elevation

- **Every 3 minutes someone is diagnosed with a blood cancer**
- **Every 10 minutes someone dies**
- **To date, the Leukemia & Lymphoma Society has invested over $1 billion in research aimed to cure blood cancers**
- **Blood cancer treatments are often used to treat patients with other kinds of cancers**
