# HELMET GUIDELINES

# WHY DO HELMET MARKINGS MATTER?

- When you exit the stairs to change bottles, we call out your department name to alert your bottle changers
- If we can't read your helmet shield ( or don't know who SVRFPD is) we can't alert your bottle changers.
- The bottle change floor is WAY too noisy for you to tell us your department name while you are wearing your air mask.

# EASY TO READ

- High contrast letters.
- Department name is easy to read
- Label is not hidden by visor or goggles

# HARD TO READ

- Smoke and heat damage makes this hard to read
- This will be even harder to read if the visor is pulled partway down
- Making a new label is needed

# MAKE YOUR OWN

- 2 inch wide EMS tape
- Quick and easy to make
- Highly Visible.
- Works great.

# MAKE YOUR OWN

- Print your own label
- If placed on visor, visor must be pulled down enough to read.
